Forecast For The United Kingdom
Issued by Met Office Exeter
at 1400 on Sunday 24 Jan 2021

UK Outlook for Monday 8 Feb 2021 to Monday 22 Feb 2021:
Confidence is low for this period, but current signals indicate a possible high pressure system around or near the UK during this period. This would likely bring cold northerly winds, producing colder than average temperatures and wintry outbreaks. The second half of February is likely to have a mixture of weather types, with periods of wet, windy and milder weather interspersed with drier, calmer, colder periods.
